PILATES

Raetin™ logo represents our commitment to maintaining high standards of quality design, education and craftsmanship.

Craftsmanship

Our products are made with the highest quality materials in the industry and are manufactured with the precision we pride ourselves on. Our equipment is stylish, beautiful, versatile, durable, reliable and effective.

Environmental Commitment

Continuous development of environmentally friendly products stems from our emphasis on the earth's environment. Our environmentally friendly products are made of high-quality materials and provide hypoallergenic options. All of our products comply with international environmental standards, and many products meet or exceed European RoHS and REACH standards.

A Visionary Leader

As the leader in mind-body exercise, our products serve the growing mind-body paradigm and support our customers in achieving their fitness goals.

Passion

Our team is made up of a group of talented fitness and wellness professionals and mind-body enthusiasts who are constantly evolving and staying at the forefront, driving the industry forward.

Equipment Built With Passion Integrity And Quality

As the science of fitness has evolved, so has Raetin. Pilates equipment. But we have always stood firm to our commitment to originality, reliability, effectiveness and quality.

Over the past few years, mind-body therapies have continued to grow and become more inclusive. More and more people, including elite athletes, rehabilitation clients and active aging clients, are using mind-body movement to improve their quality of life and overall performance. To reflect the development of mind-body movement, we have worked with a high-quality team of engineers, physical therapists, sports medicine and fitness professionals to develop new equipment to help your business attract more new students to mind-body movement. Our new equipment includes the Parallel Balance Bar, which is ideal for dynamic and plyometric training and can double the size of your current class. The cost-effective Studio and Accessory Bundles include a variety of Pilates Reformers and complementary accessories, making it easier to create and upgrade your studio. The Stability Bar is ideal for adding balance difficulty on the Pilates Reformer or other exercise forms. The High Precision Gear Bar also doubles the gear settings of the Pilates Reformer.

Raetin™ is recognized by studios, fitness facilities and fitness professionals around the world and has become the professional's choice.

We will continue to create safe and effective fitness equipment to meet the needs of studios and customers for safe and effective practice.

PILATES REFORMERS

Designed for Precision and Performance

Our professional range of Pilates Reformers is adaptable, feature-rich and engineered to perfection. Continuous development by our in-house team of fitness professionals and engineers allows us to continually improve and continually refine our machines to keep pace with exercise science and customer demand.

Vertical Frame

Combining Cadillac features, it offers powerful functionality in a minimal space with a patented mobile pulley system.

Patented Retractable Cord System

Rewinding cord reel and self-locking cleats allow for easy, accurate cord adjustment at any time. Extended cord increases range of motion and fluidity.

Neoprene Spring Sleeve

Greatly reduces noise, allows for smoother spring extension, and provides easy access when changing springs.

Comfort Foot Bar

Foam sleeves provide superior comfort with less pressure on feet and hands.

Wood Pedals

Solid wood platform provides a continuous surface for standing or seated exercises. Non-slip surface provides greater reliability.

Strap Hook

Hook mounted on the carrier allows users to store and access straps when changing exercises.

Roll-Up Bar Hook

Hook under the carrier makes it easy to store and access the Roll-Up Bar.

High-Traction Reformer Feet

Durable silicone rubber and PVC provide excellent grip to keep the Reformer firmly in place on any type of floor. Available only on V2 Max- and V2 Max Rehab Reformers.

Moving wheels

Flexible front and rear wheels for easy movement of the Reformer

Name	Pilates Reformer With Half Tower
Material	Aluminum Alloy
Spring	Ordinary spring/Korean spring
leather color	Black/custom
Net Weight	150KG
Gross Weight	195KG
Product Size	2380*1020*1860MM
Jump board Size	2450*560mm
Package Size	2560*800*520MM
Height above ground	16.25 in (41.3 cm)
Package Size	250 pounds (113 kg)

Product Configuration

The Elevated model is 16.25 in (41.3 cm) high from the floor (6.25 in/15.8 cm higher than the non-Elevated model), increasing accessibility and comfort, and making it ideal for people with injuries or mobility issues.

The semi-elevated Pilates core bed is the most widely used special equipment in Pilates training. It uses Carriage glides over sleek and rigid C-channel aluminum rails using a patented rolling mechanism for a smooth, friction-free ride.

Fully-adjustable for perfect comfort and optimal performance

6 Carriage stopper positions

4 Footbar positions

3 Gearbar positions

3 Headrest positions

Robust and adjustable four-position footbar drops easily into cradles to regulate hip and knee flexion

Wooden standing platform and pommel-style shoulder rests support a wide range of body weights.

Accessories

Square box, footrest, springboard, straps, Maple Roll-Up Pole, Extension board

Net Weight	28KG
Gross Weight	37kg
Product Size	800*630*600mm
Package Size	900*730*770mm

Product Configuration

With simple, elegant and clean design, the chair allows for a myriad of exercises to develop core, arms and leg strength, as well as balance and flexibility. Though one of the smaller pieces of equipment in Pilates, the chair allows for some of the most challenging movements in the entire program.

We honor the classics, keeping our specifications true to those of Joseph Pilates, all while keeping an eye toward innovation and sustainability.

WUNDA CHAIR:

The Wunda chair was originally created as a small apartment sitting chair that, when turned upside down, converted into a workout apparatus with two bed springs. While we no longer use bed springs, the function and purpose of the Wunda chair has stood the test of time. Our Wunda chair - a beautiful piece of furniture in its own right - is an authentic version of the original that easily converts from the working to sitting position.

CHAIR INCLUDES:

Upholstered seat with scalloped back
Solid wood pedal and comfort grip
Spring post changing system with two chair springs
Made with furniture-grade North America Maple
External visible hardware is hidden for a clean, smooth aesthetic

Name	Ladder Barrel
Material	Australia Oak
Spring	Ordinary spring/Korean spring
leather color	Custom
Net Weight	39KG
Gross Weight	61kg
Product Size	1120*640*1000mm
Package Size	1170*685*1075mm

Product Features

It can help trainers to stably perform multiple core training movements such as stretching (mainly flexibility and extensibility) from different angles, effectively alleviating and improving the muscle and bone stiffness problems faced by the current social population.

It replaces the cumbersome knob adjustment with a simple three-step locking device. It has kicking, lateral and locking functions for effective flow when teaching and completing exercises. This barrel is designed to withstand the rigors of hard workouts, including accurate step spacing and barrel contours.

The barrel includes:

Quality upgrade: 13 layers of natural native oak, equipped with solid building block ladders and railings, the material is stable, not easy to crack and deform, stable and not shaking.

The full length is fully adjustable from 325_48 inches (83_125 cm)

Skin-friendly material: equipped with special leather, tear-resistant, wear-resistant, anti-aging, breathable and not stuffy.

The padded barrel liner is vertical and thickened footboards are available separately

Adjustable knob: adjustable position to add different challenges.

Transportability

SPANNING THE GLOBE, SPEAKING OVER 16 LANGUAGES AND REPRESENTING 21 COUNTRIES 46 DISTRIBUTION CENTERS

Global Network

We have a dedicated sales team who are passionate about helping distributors discover the beauty of Pilates. As a manufacturer representing 21 countries in over 16 languages, we at Raetin Pilates are constantly grateful and amazed at the 'common language' that Pilates allows us to share with so many people around the world.

GLOBAL HEADQUARTERS AND LOCATIONS

The Raetin Pilates program is a truly global program. Our global headquarters is located in Hebei, China.

“

We take extra steps to ensure the equipment built is beautiful and lasts a lifetime.

”

Manufacturing

Our extensive collection of wood products are handcrafted in our manufacturing facility in China and manufactured to the highest quality industry standards. Having our own manufacturing facility not only allows us to work closely with our expert wood craftsmen, but also gives us the opportunity to be involved in the daily workflow and production of our equipment. This hands-on approach and close relationship between our engineers and craftsmen allows us to proactively ensure quality design and customization of every unit. In addition to manufacturing equipment to our clients' specific needs, we value our partnership with our Master Instructors to create designs that are essential and optimized for practice.

Our master woodworkers are artists who put meticulous attention to each product out of their love for their craft and their extensive woodworking expertise. For over 20 years, our talented team of woodworkers has dedicated themselves to ensuring that every piece of Raetin Pilates equipment is perfect. We are constantly striving to improve the design and functionality of all of our wood products. We are dedicated to bringing our top-of-the-line equipment to the Pilates community and look forward to perfecting each piece - preserving the past while incorporating new technological advances and preparing for change in the years to come.
